## FREE CYBERSECURITY TRAINING FOR INDIVIDUALS

### FOR IMMEDIATE RELEASE

**Portsmouth, NH - June 2020** – CyberHoot has announced free cybersecurity awareness training for individuals. During this COVID-19 pandemic, CyberHoot wanted to give back to the community to do its part and help fight the increase in phishing attacks relating to COVID-19.

In keeping with other cybersecurity solutions on the market (password managers for example), CyberHoot Bootcamp training is now free for any individual who wants it.

CyberHoot's Bootcamp program is a series of 6 short 5-minute videos and related quizzes that provide you the fundamentals of online cybersecurity in a 6-week program (a bootcamp).

All you need to do is sign up and CyberHoot does the rest. The training program is delivered directly to your inbox, no passwords required. You benefit from instant access to your training videos. You will have access to your own personalized "My CyberHoot" training page, where you can check your progress, revisit your completed training assignments, and view upcoming videos.

*Become More Aware. Become More Secure.*

---

*"Working with the team at Cyberhoot has been great! Their approach to security training is vastly different than most online training programs. Our staff have benefited from the training, governance, and compliance that CyberHoot's platform and services offer!"*

*– Tim Golden, CTO – RMC Research Corporation –*
