## CyberHoot Adds Azure Active Directory Integration

### FOR IMMEDIATE RELEASE

**Portsmouth, NH - November 2020** – CyberHoot announced today that they've integrated Azure AD user management within CyberHoot; significantly reducing manual user administration requirements.

Integrating Azure AD into CyberHoot was an often-requested feature request so CyberHoot focused its development efforts on its integration. CyberHoot prides itself on being easy to use with many time-saving automation features; with Azure AD administrators do a lot less user management.

***“CyberHoot has always been about reducing workload while improving cybersecurity for MSPs, SMBs, and vCISO’s using our tool. This important feature automates one of the last big manual processes - managing users,”*** said Craig Taylor. ***“This validates our product as one of the most powerful solutions providing Cybersecurity-as-a-Service to MSPs, SMBs, and vCISOs on the market.”***

To learn how to integrate Azure Active Directory with your CyberHoot environment, head to [CyberHoot.com/HowTo/CyberHoot-Azure-Integration/](https://CyberHoot.com/HowTo/CyberHoot-Azure-Integration/).
