## CyberHoot Improves Phishing Module & Adds Auto-Pay Feature

### FOR IMMEDIATE RELEASE

**Portsmouth, NH - February 2021** – CyberHoot announced today that they have dramatically improved their Phishing Module in CyberHoot; making it more automated and efficient for administrators to create and view results of scheduled Phishing Campaigns. Learn more.

CyberHoot released separately a new Auto-Payment feature within the 'Customer Settings' module making it even easier for Managed Service Providers to pay for CyberHoot. MSPs now only have to enter in payment information once and CyberHoot takes care of the rest. Learn more.

Improvements in the Phishing and Payment modules have been top suggestions by CyberHoot clients. CyberHoot prides itself on being easy to use and manage in a multi-tenant environment.

***“CyberHoot is the easiest multi-tenant MSP solution on the market. Awareness training for end users is simple and quick with password-less email-based access. Automated phishing and payments remove two manual processes and continue our quest of making CyberHoot easy to support and manage.”***

### List of Changes in the Module:

1. The ability to set an automatic end date and auto-closure on individual phishing campaigns.
2. An improved Phishing summary report is generated upon auto-closure of a phishing campaign.
3. A "Phishing Library" view shows what each phishing campaign email and landing page looks like from inside our phishing interface.
4. Send a phishing test now (on demand) to validate allow lists are set and working properly.
5. Automatically assign remedial Phishing training to any individual who fails a phishing test by clicking on a phishing link and/or submitting data.
6. New *Dashboard* reporting which includes Phishing Results, a *Phished Users* button linking to *"Repeat Clickers"*.
7. Repeat Clickers are recorded noted for future reference now.
8. MSPs can register a credit card under their MSP Settings to auto-pay their monthly invoice.
