

CyberHoot Phishing Assignments: Client Benefits

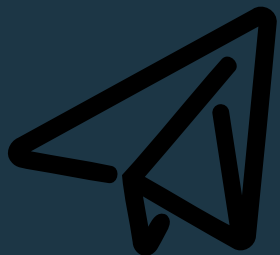

Without phish testing employees they fail to apply their cybersecurity knowledge. With phish testing they become more confident and vigilant, leading to fewer security incidents.

Compliance Scores

CEO, CFO, and the board can now see employee metrics on phish testing for the first time - proving compliance.

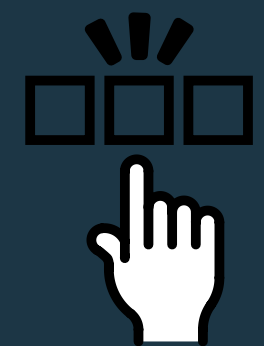

Guaranteed Delivery

IT Teams can guarantee phish test delivery to all employees easily with minimal effort.

Automatic Skill-Based Phish Testing

Advanced users complete tests quickly with minimal assistance. Beginner & intermediate users access open-book help to learn.

Positive User Testing

Traditional phish testing is punitive. CyberHoot's phishing assignments test employees using positive reinforcement for learning.

Realistic Phishing Email Testing

Assignment-based phish testing brings real-world typo-squatted domains and logos not possible in traditional phishing emails.
