

# CyberHoot's Phishing Assignment: MSP Benefits

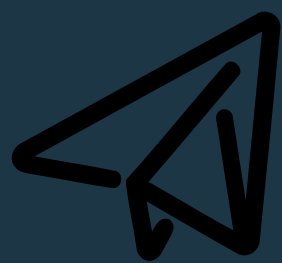

MSPs lack time and expertise to setup complex allow lists, X-Headers, and PowerShell scripts needed for email-based phish testing. CyberHoot eliminates this friction enabling MSPs to use assignment-based phish tests for every client.

## Zero Effort

No allow lists or X-Headers to setup and no powershell scripts to run when using CyberHoot's assignment-based phish testing.

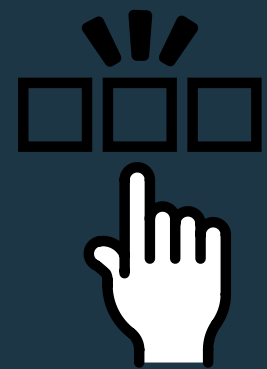

## Guaranteed Delivery

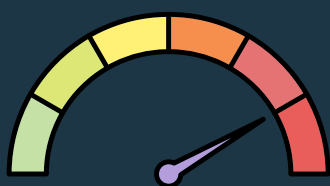

Automate phishing tests to all your customers. Phishing assignments are *'guaranteed delivery'* to end users.

## Stop Punishing Employee Failure

End negative employee sentiment from email-based phishing tests with CyberHoot's skill-based phish training assignments.

## Compliance Scores

For the first time, automatic phish testing compliance is available on every employee to share with the CEO, CFO, and Board.

## Realistic Phishing Email Testing

Use phish training emails that mimic hacker attacks with typo-squatted domain names and company logos illegal to use in email.
